Ramblings

We're Marching right into spring this month. Ok sorry about that, I'm just seeing who really reads this column. ☺

Only two more months until FDIM! WIIGII! Hope to meet you there, even if you're not a Flying Pig, swing by the hotel and say hi, or look out for us at the Hamfest and say hi!

72, oo,
Dan, N8IE Ω

Garfield Heights Hamfest/Computer Show

Hello - could you please read this & pass the word on about our show. We are a school, hosting our third hamfest & would appreciate any word of mouth before the show. Perhaps you could list it on your web page and/or put it on your repeater. Hope to see you there! Thank you & God Bless... Laura

HAMFEST
Computer/Electronic Show

WHEN
Saturday, April 13, 2002

WHERE:
St. John Lutheran School 11333 Granger Road Garfield Heights, OH. 44125 (approx. 10 mins. southeast of Cleveland, OH. - 2 hours north of Columbus, OH.) Off of I-480 & I-77. Not far from I-271.

TIME:
Vendor Set-up 7-8 am - Doors Open To The Public 8 am - 1 pm.

WHAT:
All Hamfest equipment, radio's, power supplies, cables & wires, tubes, antenna's, computer's - new/used & accessories, software, books & magazines and MUCH MORE!!!

ADMISSION:
\$1.00 per person

Eight-foot table and chair will be provided along with coffee. Tables are \$10.00 each and includes one admission. Reservations are on a first come first served bases. Payment is due as soon as possible. Limited electricity available. If tables are available the day of the show they are \$15.00 each and include one admission. Paid advance tables will be held until 8:30 am then will be sold.

At our winter hamfest we had over 50 vendor tables and 130 customers!!! TABLES GOING FAST - DON'T MISS OUT!!!

Concession stand will be available, along with coffee, pop and a bake sale. To be deleted from our mailing list, please write to Laura @ ln4js@visn.net (it's a small "L" in the email). Thanks.

FP NET

2/4

Well, I survived FYBO and my first full NCS duty in the same weekend- "lives been good to me so far" :-). The condx were good, not much ssb on my end anyway and gud signals for the four that braved the net:

KC8NYW 599 on 1 watt and caught me after the net to wish happy bday. I told him abt the cake at FYBO and Brian's xyl's fine cookin.

W1QF 589 from Detroit on !!!!!!!MP20!!!!!!! nr 6 I think he said Congrats and way to go. I promise to remember ur name next week. Terry

NV4T 569 wid qsb. Bill ur sig was probably better than that. After I learn to relax I probably cud tweak the radio a little and bring you up. I was just trying to think of too many things at one time. Tnx for qni

AJ4AY 599 Jay, I think your sig gets better each time I hear you. I think I thawed out 12:30 this PM :-)

Again thanks to all who checked into the net tonite. Those who chose to watch the football game I can't say that I blame you. Most Super Bowls lately have not been living up to the hype. This one is a good one!

72/oo-randy,wv9n

2/7

Oh my goodness
high y'all and all what a great net tonite.... great signals and good conditions...Randy thanks for the relay... u be official relay station iffin u wants to be... great job...

NCS WED NITE NET

2/11

Well, instead of giving a net report I Think I will ask for one myself :-). Had lots of checkins, some qrm, some adjacent qro sig pumping my agc at the end. All of this mixed with my confusion and late night pool shooting last night didn't help either. I think Joel mentioned something about xanax at one time. OK here goes:

NV4T - Bill - having too much fun at Orlando hamfest
 W1QF - Terry - about the only thing I did right is remember your name
 KC8NYW - Rob- running 500mw and heading for beauty sleep after road trip
 KC4URI - Steve- I'm going to polish my keyer and try to make up for working ssb
 KE1LA - Joel - where did you go? You disappeared from my radar like you might have fallen into a sneaux drift
 W5YR - George- nice to have you check in a very good signal here near Cincy. You are welcome to join this madness again.
 N1ODL - Aron - studying hard for that extra. Good luck and get a piggie shirt!
 WA5WCP - Paul - If I have messed this up for give and check in next time to correct me please
 AF4PS - Mac - Thanks for making it this time. Did you copy Joel at the end of the net?
 KD5BAJ - Bob - in Allen, TX. Thanks for checking in and come back next week

That is about all I can make of my notes. Heard a call at the end and NV4T call but I missed copy. I try to use my wider filters on the K2 for most of the net but if I get some qrm I switch to a narrow filter,. If I have used the RIT I can lose you in a heart beat. That's one thing on the K2 I wish you could do is progress back down the filter settings without having to cycle thru them. Maybe with more experience I get this down a little better. BTW - I have the keyer set to 18 wpm. What would you prefer for the net speed keeping in mind that we will always qrs?

72/oo-randy ncs (nutty control station)

2/13

High y'all
 what a net.even had a mystery checkin,, he be a mystery to me anyhow.... the real Mac said he heard him so ah put him on the list... trust u Mac.....:-)

2/17

Well the qrm was at it's best!! Thanks guy's for running interference with the big A.M. Boys:-)

W1QF, Terry. 599+10/5w Great sig Terry and great to yack a while before the net!!Your paddles were doing great!! I remember last year mobile I was banging away on my straight key, which is mounted kinda horizontal/up-side down, and the adjustments on the main pivot let loose...eeeeeeee. What fun!! Tnx qni Terry!
 WV9N, Randy...The usual 20-30 over s9:-) Great to cu Randy, and Tnx for the check-in. I know speed shifting can be a pain. The slower you go the more brain cells per second you burn!! That can be dangerous!! My xyl tells me anyway!!Agn mni tnx for the check-in Randy.

Anyone I missed I'm very sri. The qrm is bad there and I run very narrow filters. 72/00 to all! De kc8nyw, Rob. #186

2/18

Well, the band was really noisy and my hearing after listening to 40 wpm callsigns during dx test was about shot. It seems like the dx calls with hard combos (like H5, I5, or 6B etc always send the fastest code). I did hear one dx qrp station calling cq during the weekend.

Checkins were:

NV4T Bill with not much to repory
 KC8NYW/AE Rob with new upgrade, congratulations!!!
 WB8ICN Mikey finally home from the road and Melissa graduating from Navy basic shortly
 W8DIZ Diz lets us know he is not exactly thinking about us as he packs :-)
 AF4PS Mac having fun running up those dx totals
 N1ODL/AE Aron with another piggy accomplishment. Congrats!!!
 N8RQJ Harold from Columbus, OH. Stop by again next week.
 WA5PB Bill from TX (sri for missing u last week). With the band condx it was a pretty nice job just hooking up.

That is all for this week. Other than a little qsy at the beginning (I had a brain f**t for a minute) all went as smooth as I can make it. Scary, uh? ^^ keeping it clean for the under 18 age demographic.-----^^.

72/oo, randy,wv9n

2/21

High Y'all
 Great net tonite.... everybody was in here loud and clear... usually over s9.. congrats to N1ODL on the upgrade and thank u for gracing the wed nite net... with ur presence... and great signal...

Didn't think W1AW was gonna stop tonite.... then I grabbed the wrong key after N1ODL sent his great news... was talking to myself, in cw not less...
ok here are the checkins...

WED NITE NET FEB 20 02 9PM EASTERN 7.047.5 CW

2/25

Fellow Piggies-

Well isn't that wonderful?????

I started to listen about 15 mins. before the net and there was not a peep heard from 7044 to 7048. At about one minute before the net three qso's pop up in the area. I pick a spot to start and immediately have to qsy to the last spot I remember being open. Its like changing lines at a supermarket. Anyway, it turns out that calling a net remotely activates ssb directed at the checkins qth's. Well, thing start to look up, sigs coming good and getting better, my keying is qlf. Had a nice list of checkins with a new one at the end, Tom from Rock Island and thats as far we got when the bowels of the earth opened a spewed forth venomous rf all over the band. I moved up and called and then down and called but could not find any piggies. Went back to freq and the noise had a respite and some poor fellow was calling cq just a the venom was starting to return. Checkins as follows:

NV4T - BILL(still putting away xmas stuff)
KC8NYW-ROB
N10DL-ARON(wid new ant)
AF4PS- MAC
AJ4AY- JAY
WA5PB- BILL
KE1LA- JOEL(I may be needing ur service)
W1QF- TERRY
KG9LZ- TOM (pse qni agn)

Really guys, thanks for checking in. Everyone had pretty decent signals tonite until the demon got us at the end. 72/oo-randy,wv9n

2/28

HIGH Y'ALL
"less someone was messing with me, we had a dx check in to the net tonite
DL9CC... HEIN... QTH JN48ES...BADEN.... GET OTHERS to call him but everyone seemed to have dissappeared so ah

don't kneaux if my leg is being pulled or not... otherwise things seem to be wet and cold around the country... thanks for all the checkins and we gotta get to the bottom of this dl9 thing...sure was nice iffin he was real... got him longpath if ah did got him...

W2ZQ on 12.240 and 7.235, W6OI on 28.400 (10X International). QSL. Harry F. Hochman, K2IQN, FF/EMT, 22 Daisy Ct, Whitehouse Station, NJ 08889.

Peanut Whistle II

DWM COM -- What makes our CW QRP transmitter so different from all the others? Our transmitter is FULLY ASSEMBLED! NOT A KIT! In essence, we give you an ASSEMBLED transmitter for LESS MONEY than most QRP kits! No more lost parts, as with kits. No more typo errors in the instructions, as with kits. But wait, there's more! We supply you with information on how you can build your very own "PEANUT WHISTLE TWO" for 30 meters! [Beware of the proper propagation now - Editor]

This unit is complete. So small, you can mount it right on your code keyboard! Just add your battery, dipole antenna, crystal and key! Grab your portable short wave receiver (examples: Radio Shack DX-390, DX-392, DX-398; Grundig YB-400; Sony 2010, 7600; Sangean 818, 818CS, 909, etc.) and you're ready to go "on-the-air" with an impressive portable ham radio station! Operates on 12 to 14 volts DC. Approximately 2 1/2 watts output... plenty of power to work DX! COMPLETE instructions including 30-meter information. We also supply you with information on where to purchase transmitting crystals.

ATTENTION!! By popular request, we have decided to offer transmit crystals for our PEANUT WHISTLE TWO qrp transmitter. The crystals were purchased NEW from JAN CRYSTALS in Fort Meyers, FL and are cut for the internationally recognized QRP calling frequency of 7.040 MHz. We are offering the crystals to you AT OUR COST, with the purchase of our PEANUT WHISTLE TWO.

Sorry... no individual crystal sales. The cost of the PW-2 transmitter WITH crystal is just \$29.95 (plus \$6.95 s&h). The cost of the transmitter without the crystals is \$19.95 (plus \$4.95 s&h). Remember! These transmitters are COMPLETELY ASSEMBLED! NOT A KIT! Yet...they are priced LESS than many kits!

The "PEANUT WHISTLE TWO" is STILL ONLY \$19.95 + \$4.95 USPO:

Member Spotlight!

This month were spotlighting:
KB9RVB--Carl--FPQRP #365

Carl is from Bloomington, IN became interested in ham radio in the late 1950's along with high school classmates in suburban Pittsburgh, PA, like Dell Palmer K3AXR, who has been a ham since 1955 but who needs to get into QRP on 40 meters from the DC suburbs so they can renew interests.

But it wasn't until he met Rick (FP#145) KB9NDF 40 years later that he buckled down and passed Technician in December of 1997. An incident with an unbreakable "rubber duck" resulted in a commitment to KB9NDF to pass the code, completed in April of 2000. The code classes with Millard K9DIY and a Flying Pigs forum at the Hoosier Hills Hamfest in Bedford (IN) sparked his interest in QRP enough to result in the General license in March of 2001. He hosted K9DIY's QRP forum at the Owen County (Spencer, IN) Hamfest in the fall of 2001. It was that and the Flying Pigs 2001 forum at Hoosier Hills two weeks later that he was inspired by Diz (FP#1) W8DIZ, Dan (FP#6) N8IE, Brian (FP#57) KB9BVN, and Kent (FP#80) KB9VZS to finally take the plunge into QRP.

He has two QRP-inspired projects now started with the Bloomington Amateur Radio Club, where he is a member of the board of directors: code classes for both new certifications and brushups for those who haven't been using the code since upgrade; and a QRP kit project being led by club president Jay KA9OKT -- seven hams, two Generals, three Extras, and two Technicians will be building the Foxx 3 40-meter kit. "We'll need a good antenna tuner project and an antenna to follow up," he grins.

Carl has been since 1994 the instructional technology coordinator with the Monroe County (IN) schools where he had been an English teacher and wrestling and football assistant for most of 30 years. He and his XYL Linda have two daughters and two grandchildren. He shares his love of photography, model railroading, and bad harmonica with both of them, although the 18-month-old boy is better on the harp while his 6-year-old sister is great with a camera. "I have some hope that amateur radio will strike a cord, since their father is an electrician," he says. "They've got some tower space at the home they are remodeling."

You can visit Carl at <http://www.mccsc.edu/~czager/> or e-mail him at kb9rvb@arrl.net.

Only 13 in the log last night...I spent the 25 minutes fighting noise and incredibly loud (at least here) SSB.

Here's the log:

1	0131	7045 W5YR	559 TX GEORGE	5W
2	0132	7045 K0EVZ	559 ND DOC	5W
3	0133	7045 W8DIZ	559 OH DIZ	5W
4	0134	7045 WV9N	559 OH RANDY	5W
5	0136	7045 AC5JH	559 OK TOM	5W
6	0137	7045 N9NE	559 MI TODD	5W
7	0139	7045 N1TP	559 FL TOM	5W
8	0141	7045 K5DW	559 TX DON	5W
9	0142	7045 K5JHP	559 TX BILL	5W
10	0143	7045 AA5O	559 LA VERN	5W
11	0148	7045 AJ4AY	559 AL JAY	5W
12	0151	7045 W0CH	559 MO DAVE	100MW
13	0154	7045 K8DD	559 MI HANK	5W

I'm pretty sure the calls and names are right...Somehow, I doubt W0CH was running 100 mw, but that's what it sounded like, and I hit CFM without thinking it through.

I knew I was in trouble when K0EVZ, who is usually loud, was just barely above the noise. I could hear folks calling but just couldn't get many breaks in the noise.

The last five minutes was nothing but SSB. Next time, I think I'll try for below 7.040.

At any rate, I had to wait almost 90 minutes into the hunt to get W8RU (0322Z) and N4DD (0328Z) so conditions just weren't that great last night in West Texas. Thanks to everyone who took their best shot...I have one more shot at breaking 20 in March. Hope to see you there.

Well, that's 18 in 30 mins. I was hoping for at least 15.

Can't swing a dead cat on 40m without hitting a West By God Virginian these days. Nothing wrong with that. George, I was sure I would get your call on the 16th time I asked for it...but I think it took one more. Heavy SSB was cranking it up here at the end of the truffle hunt.

WV9N was the loudest signal heard. He's right at 90 miles SE of me. He has this old Lincoln Contentional that's just incredible....ask him about it sometime. It was good to work Porky in there, last QSO with him was a year ago.

I did pick up some new states. Diz, change my total to 28 now. Thanks.

Gotta get some sleep now, sinus meds kicking in...hallucinations due any moment now.

72 es OO

2/19

Thanks to all for the good turnout tonight. Didn't hear the first call until 4 minutes into the hunt. I don't know if I have a rig problem, a hearing problem, or both. I had a great time in my three hunts this year (they were my first three ever) and looking forward to next year. Thanks to all who turned out and wish I could have those first four minutes back to hand out more truffle :-).

UNTOUCHABLE QRP

By Arnold CW Timm

Low power pontiffs suffer for their battery mode. As the sunspots decline, and the employment options offer less means to make big bucks, Flying Pigs fly off the paddle. An uncomfortable gadget is then brought to bare. Not your ordinary thingamajig, but a giant pair of Russian ears! These especially designed hearing aides will definitely enhance your low power experience. Rather than 559 — signal strength will even amaze your computer code reader! And that is saying something. You'll have to assemble your own however. Such a device would be considered an unfair advantage over slope detection, etc. They operate like sound powered phones some say. Hi

Jay WB0L always said that in order for Qrp people to be heard, there needed to be a larger array or beam, aimed at them. This is true during low sunspot cycles. The proper propagation almost demands some kind of a gain or high signal to noise ratio, upon which we are obviously impaled around 14.060. The vertical element whipping in the breeze fights for fade, if not on either coast. And being heard is far better than talking to the walls. Less lead paint on the forehead, soldering station, and/or fist of hands.

Once the new band plan is unleashed, gobs of goofy operators may plug our playground. The learning scale (to get up to speed), could become quite lopsided. Gathering dust in our basements, that cat of nine tails — can snap these beginners into line. Mobile parking lots leaping from the freeway onto 7040. We might have to withdraw farther into the fog bank. Introverts biting the hand that feeds them. Qrp cw need not worry however, modulation itself, corrodes much of the spectrum assigned. Rusty wrists are more prone to microphone once the chips are down.

Eliot Ness and the Chicago organized crime bosses (1930s) fought tooth and nail, to rid our capitalist system of entrepreneur sprits. Gut wrenching monetary gains filled the coffers and pocketbooks, of ordinary Al. Corruption catapulted over livelihoods and gangsters alike. They never got to see the inside of homebrew. Lost the chance to experience each elemental component necessary in assembling apparatus, behavior, or beverage. The price of ignoring: Much of modern day wireless telegraphy is apparently also hidden from mainstream America. Sandwiched into surface mount maiden forms, thrusting not its essential meaning. Strange how we stumble over yesterday in order to achieve tomorrow. Its "too technical" digital data further belittles Qrp cw — an already minimal might. Each operator should show- case his/her plaything. The discipline and patience of Morse code utilization could be additionally shared. Our powers-that-be may reroute spectrum, ridicule anything less than 100 watts, and refuse to understand our insights. Adrian Weiss wrote two books on this subject matter. Attempting to organize thought and reason, as the sunspot cycle dove. Other silent keys shouted from their landmarks. Percentage of patrons pondering Qrp cw rise and fall with the times.

Way back in the 1960s black plastic encapsulated code practice oscillators were sold. All the component parts were sunk into Castalite* compounds. Touchy feelings were prevented by this cover up. Kids and Grandpa played coded communications under such black listed long hand. Of course, if the transistor failed, group CW practice would have to relay in semaphore. That is if Grandpa was Navy trained. Sequestered germanium transistors died of battery polarity mistakes most often. Their death thereafter, meant less merit badges or demerit wails of regret.

There is a caveat herein however. Exposing good fishing spots suddenly swarms rows and rows of agile anglers. Fishing lines and misquote bits blister our catch and release food gathering. Never volunteer your favorite fishing or qrp frequency point. Pileups pervade without much sense of wonder. Like starving grasshoppers, gold diggers, and mobster mentality, they wait until you've done all the hard work; then it's a field day until the meaning is gone. Partake of a kit of parts project. Be it as simple as a regenerative receiver. Find out how a junction field effect transistor performs and judge for yourself, how "simple" a simple circuit really is. When we purchase our HF transceiver already tested and assembled, we may be reducing our chance to discover its enormous potential. And as solar cycles plummet deeper into surrounding ground potentials, D layer ionization's seldom satisfy us with distant locations. Currently a Ramsey Kit HF linear amp kit is handy.

In conclusion then. No matter how well we understand, appreciate, or malign our radio hobbies, their diversion serves forth its solace. Rather than disclosing every facet of the diamond broach or the feminine neck it sensationalizes, we speculate to the point of distraction. Hidden elements of human being fascinated in either object or hormonal disturbance, does more than stripping bare the item. Qrp cw runs in circles of crazy eight. Sine waves circling our sedentary selves. Whether we raise our dipole antennas to a half wave above ground or secretly savor it in stealth – like situations, Qrp cw certainly deserves a pat on the back. And an iambic paddle proudly squeezed to the tune of Forever Yours!

About the Flying Pigs QRP Club

OUR MISSION:

- 1: Have Fun.
- 2: No rules.
- 3: Have a group of Friendly Hams who enjoy Amateur Radio, and sharing their skills with their fellow Hams.

CLUB EMAIL POLICY:

These are not rules, just common sense.

Club email is not moderated, as we are not a stuffy group. You can send off topic messages about most subjects, but please keep it clean and in good taste. We do like good-natured ribbing and joking with each other, but we will not tolerate flaming other members or spamming the group.

We will remove offenders who abuse our open policy.

CLUB WEB PAGE:

The club web page is our forum for sharing projects, and information about us. You are encouraged to submit your ideas and projects to be added to the web page.

PROBLEM REPORTING:

If you are having problems with email, the web page, or a fellow club member, please report this to either:

Diz, W8DIZ at w8diz@cinci.rr.com

Rick, WB6JBM at ripowell@mpna.com

Dan, N8IE at n8ie@who.rr.com

We welcome all to join the Flying Pigs QRP Club, and we hope you have fun! Ω
